

COVID-19 PRECAUTIONS

Public Transport, Travel and Flights

QUARANTINE

The Australian Government in line with the World Health Organisation has now locked down all persons entering our country for a period of 14 days isolation. This is mandatory as of the 15th March 2020.

PUBLIC TRANSPORT

In line with the standard requirements of the Hierarchy of controls that we apply in our everyday Risk Management, eliminate all unnecessary travel and public transport. We still need to earn wages and live our lives; our economy also needs us to keep going as long as we possibly can.

PRACTICE GOOD HYGIENE

Practice good hand hygiene - that is washing your hands if you cough or sneeze on them whilst covering your mouth, if you shake hands with anyone or just after touching surfaces, handrails and the likes.
